There were validation issues with the following resources. They were not able to be checked

This is a validation report using pySHACL to process the provided data graphs against the noted shape graph. A heat map of the results is seen below to provide a quick over view. However, the details are easier to leverage from the generated CSV document that will come with this report.

Checking 14712048 object(s)

For more information about validation please visit the project documentation. Details of the errors reported can be found in the shape file documentation page.

## **Details**

Details of the detected violations and the associated reference node are found in the CSV that accompany this report: validationReport\_02-23-2023-01-04-26.csv
